GROW YOUR ORCHIDS THIS SIMPLE WAY

The requirements of Orchids are few and are easily met in the average home. They are:

1. PLENTY OF SUNLIGHT. A south or east window, unshaded from November until March, lightly shaded from 9:30 to 3:30, with a thin gauze-like curtain the rest of the year. (If the plants can be placed out in the yard under light shade during the months when no frost occurs so much the better.)

2. SUFFICIENT WARMTH. The usual house temperature of 60-70 degrees at night and 65-85 degrees in the day is fine. No damage is done by occasional drops by the thermometer even into the thirties if only for short periods.

3. FOOD. If you want flowers year after year and strong husky growth feed your plants with a solution of one teaspoonful Fenorco Plant Food to the gallon of tepid water. Feed weekly.

4. WATER. Water plants heavily only once per week—lightly once or twice weekly. Re-

member, let them dry out between watering.

Water with tepid water by pouring water over the plant—always water during the morning—the water will run directly through the pot. A plant in a 5" pot should have, for a heavy watering, approximately one-half gallon of water poured through it. It is best, when watering, to take the plants to the kitchen sink or a laundry tub and to do the watering there. The gravel pan (Cake Pan) mentioned in paragraph 6 is used only to prevent dripping and to keep the plants from drying out too quickly. It is not a means of watering.

5. CLEANLINESS. The easiest way to keep a few plants healthy and clean is to wipe them down weekly with a wet cloth or sponge and a mild soap such as Ivory. During this process remove the papery sheaths from old growth. If you leave a little suds on the plants it won't hurt them.

192—STARTER COLLECTION—

Five, fine, flowering size plants including 2 Cattleya trianae (winter), 1 Cattleya Gaskelliana (Spring), 1 Laelia anceps (Fall), and 1 Dendrobium Phalaenopsis (Fall), plus 1 pound of Fenorco Plant Food. A \$39.00 Value.

Cost with transportation prepaid east of Rocky Mountain States (in U. S.)..... \$28.50
U. S. West Coast \$31.50

193—HYBRID STARTER COLLECTION—YOU SAVE \$12.50

Five plants in all. Finest hybrids. 2 large flowering size, corsage type Cattleyas in 5" pots in sheath and 3 smaller plants in 3" pots, each plant 6 to 8" tall, should flower next year. One of the smaller plants is a pure white hybrid. A \$50.00 value.

Cost with transportation paid east of Rocky Mountain States \$37.50
U. S. West Coast and Rocky Mountain States \$40.00

6. EQUIPMENT. The plants can easily be grown in any room with sufficient light with only very simple equipment. Get a large shallow pan or dish—a glass or aluminum cake pan is fine. Fill the pan with gravel to the top and with water to about 2/3 the depth of the

gravel, place the pan on the window sill or over the radiator in front of the window and place the orchid pot on the top of the gravel. Keep the water level as constant as possible, but always below the bottom of the orchid pot. (See illustration on page 3.)

This pan of wet gravel keeps the plant from drying too fast, provides sufficient humidity for the plant, prevents excess water from staining the floor and window sill (and incidentally helps provide more pleasant living conditions in the room for you by adding some needed humidity.)

7. REPOTTING. All our plants come to you in pots. They will not need repotting for about two or three years.

If, by accident, a pot is broken, obtain one of the same size and firmly press the plant and osmunda fiber into it.

FENNELL ORCHID COMPANY, HOMESTEAD, FLORIDA

Orchids That Are Easy to Grow

SPECIAL
PRICE

- 194

CATTLEYA HYBRID SEEDLING SPECIAL — You Save \$7.50
Seven fine young Cattleya seedlings in 2-in. to 3-in. pots, each plant 2-in. to 4-in. tall. These plants should bloom within 2 to 5 years. Price also includes one pound FENORCO Hydroponic Plant Food. Value \$18.50.
- 195

FENNELL ORCHID COMPANY, HOMESTEAD, FLORIDA

MANITOWOC, WISCONSIN
JUNE 27, 1953

Fennell Orchid Co.
Homestead, Fla.

Dear Mr. Fennell:

My orchid that I bought from you in March has just produced! Not one blossom as I had hoped but 4 exquisite flowers.

I had little hopes of me being able to be successful (never have been with ordinary house plants) so you can imagine what a thrill it has been to watch that sheath open up its prize package of four beautiful blooms. They are 4-4½ inches in width and the lip is 3 inches long, a beautiful, light lavender with deep reddish-purple lip and very fragrant.

It surely has been worth the price already with all the enjoyment I've had from it so far. Orchids in Manitowoc are really a novelty. The paper called and asked to take a picture of it. I am sending you a copy.

Sincerely,
Mrs. R. P. Rowley

TERMS — Cash with order. Sorry, no C.O.D. No packing charges. Unless otherwise stated, all prices FOB, Homestead, Fla.

201—SENIOR HYBRID COLLECTION—You Save \$30.25

Six large, strong, flowering size plants of highest quality in 5 or 6 inch pots. Will produce flowers similar to those shown above.

WE PACK ALL PLANTS VERY CAREFULLY — WE GUARANTEE SAFE DELIVERY — ANYTIME — ANYWHERE IN THE UNITED STATES.

Mr. Fennell —

Please tell me---

DO YOU SHIP ORCHIDS? We ship orchid plants all over the world as well as to thousands of satisfied customers throughout the U.S. and Canada.

HOW OFTEN DO ORCHIDS BLOOM? *Cattleya* species plants usually bloom one time per year per lead, though large plants of *C. trianae*, *C. Mossiae* and *C. Gaskelliana* sometimes bloom on two bulbs per lead per year. Some of the better hybrids bloom several times per year.

HOW LONG DOES AN ORCHID PLANT LIVE? We have plants at the ORCHID JUNGLE that we have had in the family since 1888.

DO I NEED A GREENHOUSE TO RAISE ORCHIDS? Not unless you wish to raise them in large quantities. They can be raised in your home by the Cake-pan method if you have a sunny window and follow the directions.

MUST I HAVE A GLASS CASE TO GROW ORCHIDS IN MY HOME? No, in almost all cases it is easier and more satisfactory as well as much cheaper to grow plants on the "cake pans" than in closed cases. Glass cases inside the house usually cut down the light available to the plants, they are too stuffy and generally plants in them are kept too wet.

I LIVE IN CANADA—CAN YOU SHIP ORCHID PLANTS TO ME? Yes, write to your Canadian Department of Agri-

Visitors come from all over the world to see the "ORCHID JUNGLE," only 25 miles south of Miami. Follow signs on U.S. No. 1. Here one of our charming guides shows visitors a large *Cattleya Gigas*. Orchids from every part of the world flower in abundance on our great oak trees. Every lady visitor receives an orchid.

YELLOW and BRONZE CATTLEYAS

C. Granulosa (center) — *C. Dowiana aurea* (right) and their fine, summer flowering, heavy textured, hybrid *C. Pittiana* at left. The color of *C. Pittiana* sepals and petals varies from light yellow to deep bronze and its lip from lavender to deep maroon purple. We have good, flowering size plants of *C. Pittiana* at \$25.00 and \$35.00 each.

culture, Ottawa, and request that they send you an import permit. You will be sent a permit number and an address sticker. Send the address sticker to us with your order. We advise shipment to Canadian points only between May 1st and October 1st. Any shipments made outside the above period to points in Canada must be entirely at the buyer's risk.

WE WANT YOU TO SUCCEED!

Our orchids are all carefully selected, strong, healthy plants. We do not sell back bulbs or culls. If you want to succeed, start right with strong plants. We furnish growing instructions with all plants.

WE DO NOT BREAK COLLECTIONS

We are sometimes asked to divide and ship a collection to two or more places. Unfortunately, we cannot do this. Collections are priced for shipment as one order to one address.
